SUPPLEMENT TO  
REPORT NO.

25X1X

1. In 1946 the Dutch electronics firm Philips of Eindhoven contracted to supply the Polish government with technical assistance for the manufacture of light bulbs and radio tubes in Poland. The Philips plant which had been in Warsaw prior to World War II had been completely demolished and the site nationalized by the Polish government, making it impossible for Philips to rebuild their plant.
2. At present, the Polish government is building a factory on the site formerly held by Philips, 32 Karolkowa, Warsaw.\*\* An unspecified portion of the machines for this plant, which is now two-thirds completed, was supplied by Philips, who will continue to supply certain parts under the terms of their agreement with the Polish government. The Philips firm has no control over the plant in Poland.
3. The Polish factory will produce incandescent and fluorescent lamps for normal illumination purposes and the following radio tubes for use in civilian receivers:
